

CRACK-O-MAT E Electro waste dismantler

- Suitable for household appliances, toys, electrical and electric tools, etc.
- Cracking of the plastic housings for removing metal parts
- Turn Key Design
- Metered Material Transfer to Sorting
- No risk of Injury for Personnel
- Low Dust formation
- Space-saving
- Low Noise Level
- Low Energy Consumption
- Economic Purchase Price
- Slow Runner

General Drawing

Short Description

The manual opening of the plastic housings of used small household appliances, electric and electronic tools, toys and medical equipment is time-consuming and dangerous. Splitters and sharp edges, as well as the appliances' contents may cause injuries.

The Dismantler executes this work automatically, safely and fast. The plastic housings are coarsely broken. The inside parts remain intact and can be removed safely.

The crushed housings are transported to subsequent sorting in a continuous material flow.

Technical Data

CRACK-O-MAT:	E-12	E-18	E-24
Working Width:	1.200 mm	1.800 mm	2.400 mm
Throughput Rate:	2 t/h	3 t/h	4 t/h
Connected Load:	11 kW	11 kW	15 kW
